2015-16													

In late 1995, ASOS (Automated Surface Observation System) replaced the human observations at the Eugene. ASOS does not have the ability to measure snowfall. As a result, snowfall was not available since winter of 1995-96. To compensate, snowfall at the airport was derived using data from the Fern Ridge Dam and area storm reports. Regular measurements for Eugene Airport will begin again in late 2012.
